

**Amendments to the Specification**

Please replace the paragraph beginning at page 1, line 3, with the following rewritten paragraph:

**--Cross-Reference to Related Application**

This application is a continuation of prior copending U.S. Patent Application No. 09/951,662, filed on September 10, 2001, now U.S. Patent No. 6,644,342, which is incorporated herein by reference.--

Please replace the paragraph beginning at page 9, line 7, with the following rewritten paragraph:

In automatic operation, when the wastewater within the well 12 reaches an upper limit U as sensed by the level sensor 94, one or both of the pumps 78 are selectively triggered to begin operation and evacuate the wastewater. The pump 78 continues to operate until the wastewater decreases below a lower level L as sensed by the level sensor 94, at which point the pump 78 is controlled to cease operation. The level sensor 94 may have indicia to allow the operator to visually check the level of wastewater within ~~with-in~~ the well 12.
